

The Cutting Edge of Success

PRECISIONCUT™

**LLumar PrecisionCut™ System is your all-in-one source for LLumar Automotive Tinting, LLumar Paint Protection, LLumar Flat Glass, and LLumar Safety Film cutting needs.**

**In the time it takes you to click the mouse, you are well on your way to a more precise, micro-edge fitting pattern that will blow you away!**

## Explore the Potential

Your business deserves the profitability, efficiency, and consistent quality of a company using the latest innovation in film technology. CPFilms' desire to see you achieve new levels of success has led us to develop the LLumar PrecisionCut™ System. LLumar's cutting edge technology will allow you to lead the market through new business opportunities.

## About the System

### Turn-Key System

The LLumar PrecisionCut™ System is your all-in-one source for the automated cutting of LLumar automotive, paint protection, flat glass and safety films as well as graphics. This turn-key system comes with everything you need to get started.

### User Friendly Operation

With a few days practice, you will master basic operations of the system and be ready to explore the extensive capabilities available for the advanced user.

The process is simple. From your computer you can select patterns from one of the databases and arrange them to minimize film waste. Send the file to the plotter and your film will be precisely cut to fit your installation.

### Training & Support

CPFilms Technical Support staff will offer training on the setup and operations of the LLumar PrecisionCut™ System. You will also receive a step-by-step training CD to expand your knowledge and to use as a reference. Once operational, you will have access to online technical support.

## System Benefits

### Enhanced Efficiency

Most installers agree that cutting patterns is the most difficult, time-consuming part of an installation. With automated cutting, you can reduce labor and training costs while increasing productivity by as much as 70%. Plus, liability is limited because there is no cutting on the vehicle.

### Increased Profits & Less Film Waste

Film waste can significantly impact your profit margin. When film is cut on the LLumar PrecisionCut™ System, film waste is reduced by up to 80% over hand-cutting. Maximizing the use of your film and keeping track of your inventory will enhance your bottom-line.

### Opportunity to Expand

For traditional automotive film dealers, the LLumar PrecisionCut™ System presents a new opportunity to diversify your product offering in the off-season with paint protection and flat glass films.

You may also choose to initiate business with car dealerships. Because most new car dealers have a standard offering of vehicles you can pre-cut kits for the dealer and use the system to manage inventory.

## System Capabilities

### Paint Protection Films

Cut full vehicle kits or individual patterns with precision. The kits have smooth edges and corners for an easy lay-down during installation.

### Automotive Films

It's easy to locate a vehicle in our pattern database. Just select the vehicle's year, make, and model for a perfectly fitted pattern.

### Flat Glass Films

Micro-rounded corners and the ability to pre-cut windows accurately will speed up installation and can significantly reduce waste.

### Safety Films

Accurate pre-cutting of thick films (up to 7 mil single-ply) tremendously increases installation efficiency and quality in this very labor-intensive market.

### Graphics

Nearly 2,000 graphic patterns are now available, and can be cut in film or vinyl for installation on flat glass and automobiles. You can also import your own graphics to customize an installation with a special design or logo.

## LLumar PrecisionCut Patterns

### Window Film

### Paint Protection Film

## System Contents

### The LLumar PrecisionCut System includes:

- 60" Graphtec Plotter
- Dell Desktop Computer with Monitor (XP Professional)
- LLumar PrecisionCut Software and Pattern Databases (1 year subscription)
- Extra Blade Holder for Cutting Paint Protection Film
- Replacement Teflon Strip
- Online Technical Support
- System Setup and Operations Training CD
- Factory-Backed Warranty

## About Lunar

Lunar Solar Film was established in 1999, and has not been sold on the market until now April 1st 2006. Lunar Solar Film was founded by two very successful window tinting professionals on a quest for better quality at an affordable price. For the first two years we went through stages of trial and error to make the perfect film. For the last seven years we have been undergoing extensive real life testing as well as simulated testing to make sure that we can offer one of the best auto films in the world. For the past five years Lunar Solar Film was used and tested in various environments such as Arizona, Texas, New York, Florida, and California. The film is color stable and will never turn purple. We back the film with a lifetime warranty against any imperfections. Lunar Solar Film also carries security film that comes in 4 mil rolls, 8 mil rolls, or 12 mil rolls. This film is priced so well no one can compete with our pricing matched with our quality. We at Lunar Solar Film are selling our customers one of the best auto tint film on the market.. The owners of Lunar Solar Film not only sell this product but have been using it for the past five years. With over 30 years in the tinting business we here at Lunar Solar Film know what every professional installer wants; a high quality, reliable film company, with an impressive service and a lifetime warranty. Unlike any other film company in the world, Lunar Solar Film will never raise an existing customers film price ever! We understand what it is like when a company raises their prices. LSF is currently working on a more innovative film line that will be called the AJJ series. We will keep our customers informed on all new products. LSF is committed to give our clientele up to date technology, and be ahead of all the rest and stay the best.

## Our Products

Here at LUNAR we know what you demand- The best film for a great price that shrinks with ease!!! Our film is color stable! No turning purple ever!! We back our film with a lifetime warranty against any defect whatsoever, unlike any other film company! Also unlike any other we at LUNAR offer floating scale pricing. What that means is, the more film you buy the cheaper the film will become. The owner and operator of Lunar has been a professional window tinter of 30+ yrs. Who better to purchase film from, then a guy who use's it everyday and has over 30 years experience. Here at Lunar we would like to thank you for purchasing and using our film and hope that you continue to use LUNAR film as your film of choice on every job you do.
